Learn from people who are building the real world.

Mentor Campus brings senior industry leaders directly into colleges for expert talks and interactive sessions — engineers and AI leads, founders, policymakers, clinicians, journalists and athletes speaking candidly about their work, instead of another textbook lecture.

Technology & AI | Business & Startups | Government & Policy | Healthcare | Media & Arts | Sports

HOW THE SESSIONS WORK

Expert talks

A senior leader visits your college for a single session, followed by open Q&A with students.

Panel discussions

Multiple experts discuss a shared theme, moderated for students in an interactive format.

Interactive workshops

Smaller, hands-on sessions that go deep on one specific skill or topic.

> *"Students don't need another lecture about the industry — they need someone already in it, willing to answer the honest questions."*
>
> MENTOR CAMPUS, PROGRAM PHILOSOPHY
